

Ch. 13 perimeter and area, circles targets

I can calculate the perimeter of a square and rectangle.

I can calculate the area of a square and rectangle.

I can find the area of a two-dimensional figure by counting the same size square units that cover the shape.

I can justify that length and width are multiplied together to find the area of a rectangle.

I can use square units to label area measurements.

I can calculate the perimeter of a triangle.

**supplementary:*

I can identify diameter, radius, center, and chord of a circle.

I can label the circumference of a circle.

I can label the radius of a circle.

I can label the diameter of a circle.

I can label the center of a circle.

I can find the radius of a circle given its diameter.

I can explain how to find the radius of a circle given its diameter.
