Ch. 6 Division targets

I can recall my basic division facts (all) up to ten automatically.

I can divide using single digit dividers.

I can use multiplication to check my quotient.

I can estimate a quotient by rounding.

I can estimate a solution to determine the reasonableness of a multiplication or division problem.

I can create a multiplication or division number sentence to represent a real-world situation.

I can find the values of the unknowns to make a multiplication or division number sentence true.

I can solve problems using more than one strategy or algorithm to divide multi-digit whole numbers by one or two digit numbers.

I can model division problems using repeated subtraction and partial quotients.

I can explain multiplication and division number sentences.
