# **VOWEL PAIRS**

There are many, MANY vowel pairs or vowel teams in our English language (more than 20). The fancy word for a vowel pair or vowel team is diphthong.

A diphthong usually has two vowels together that have one sound.

The diphthong might carry a similar sound to one of the vowels included:

ee = long / e/ sound as in feet.

Most likely, the sound of the vowel team will be a unique sound:

oi & oy have a unique sound as in boy and boil.

The letters  $\underline{y}$  and the letters  $\underline{w}$  are often part of a vowel pair. We also have some very unique diphthongs that contain the letters <u>gh</u>.

ay =	long /a/ as in d <u>ay</u>
<b>ow</b> =	long /o/ as in sn <u>ow</u> or /ow/ as in pl <u>ow</u>
igh =	long /i/ as in f <u>igh</u> t

**ea** typically found in the middle of a syllable though sometimes found at the beginning

three sounds; in order of frequency:

- 1.  $\log /e/$  as in bl<u>ea</u>chers
- 2. short /e/ as in w<u>ea</u>ther
- 3. long /a/ as in br<u>eak</u>, st<u>eak</u> and gr<u>eat</u> (these 3 words only)

When reading an unknown word with the vowel pair **ea**, always try the long e sound first.

A saying to remember the three sounds of **ea** in order of frequency: <u>*Ea*</u>t br<u>*ea*</u>d and st<u>*ea*</u>k.

**oi** typically found in the middle of a syllable though sometimes found at the beginning

one unique sound: /oi/ or /oy/ as in the word boil

**oy** always has this same sound though is typically used at the end of a word.

**ou** typically found in the middle of a syllable though sometimes found at the beginning

one unique sound: /ou/ or /ow/ as in the word shout

**ow** always has this same sound though is typically used at the end of a word.

**ai** typically found in the middle of a syllable typically followed by the letters  $\underline{n}$  or  $\underline{l}$ 

one sound: long /a/ as in the word pai or pai or pai n

**ay** always has this same sound though is typically used at the end of a word.

Many words with **ai** are homonyms. This means that the word may have more than one spelling.

Examples:	main	mane	tail	tale
	pain	pane	waist	waste

**igh** found in the middle of a syllable typically followed by the letter  $\underline{t}$ 

one unique sound: long /i/ as in the word f<u>ight</u>

oa typically found in the middle of a syllable

one sound:  $\log /o/$  as in the word bodat

**ow** always has this same sound though is typically used at the end of a word.

**aw** typically found at the end of a syllable (mostly one syllable words) often followed by the letters  $\underline{n}$  or  $\underline{l}$ 

one unique sound: /aw/as in the word saw

au typically found in the middle of a syllable
one unique sound: /aw/ or /au/ as in the word f<u>au</u>lt
aw, au & augh share this same sound

**augh** typically found in the middle of a syllable

All seven words in our language with this spelling and pronunciation are in this sentence:

*The <u>distraught</u> farmer <u>caught</u> his <u>naughty</u>, <u>haughty daughter</u> and <u>taught</u> her not to <u>slaughter</u>.* 

There are many ways to spell the sound /oo/ in the English language.

u-e	u	00	ew	ue	ui	eu
(rude)	(puny)	(school)	(new)	(blue)	(suit)	(feud)

The first three listed above are the most common. The next two vowels pairs are the first choice at the end of the word though there are no rules to guide which vowel pair to use. The last two vowel pairs are used very rarely.

ew	typically found at the end of a syllable one sound: long /oo/ as in the word n <u>ew</u>
ui	typically found in the middle of a syllable one sound: long /oo/ as in the word s <u>ui</u> t
ue	typically found at the end of a syllable one sound: long /oo/ as in the word bl <u>ue</u>

**ough** typically found in the middle of a syllable
